

# Memory Care

We Offer *Help and Hope* to Families

Each of our centers provides care for individuals with Alzheimer's disease or related dementias. Our focus is to nurture each person's remaining skills and changing abilities in an atmosphere that brings comfort and encourages simplicity, familiarity and trust.

Our cozy, home-like, environment offers each resident a sense of comfort, respect and understanding that meets their unique situation. We have implemented activity programming that includes interactive and structured activities, therapeutic stimulation and flexibility in programming to accommodate interests and special needs.

## Family Support

Family involvement is important in our mission to enhance the quality of our residents' lives. We encourage families to participate in team conferences with staff. Our centers support family caregivers and provide expert information and opportunities for families to remain close and connected.

## A Secure Setting

For individuals with more acute Alzheimer's and dementia, Altercare provides a more secure environment. Specially-trained professionals apply the latest information from science, psychology and knowledge of human nature to create a safe and satisfying quality of life for residents..
